

Young Investigator Awards for Best Posters

P-02-008

Elif Weidinger

Role of vitamin B6 in immune-kynurenine pathway interaction in depression

P-03-013

Yui Yamamoto

Fatty acid binding protein 3 (FABP3) knock out induced cognitive dysfunction and an anxiety phenotype

P-04-018

Patrick Schelenz

Influence of acute tryptophan depletion and a selective serotonin inhibitor on resting state network connectivity: A pharmaco-fMRI study

P-06-017

Hirokazu Doi

Prenatal exposure to polychlorinated biphenyl (PCB) congener impairs socio-cognitive ability in human four-month-olds

P-09-011

Damiano Azzinnari

Effects of low-dose Ketamine on antidepressant-test behaviour and on mPFC glutamate release in mice: Comparison of racemic and S-Ketamine

P-13-010

Kenji Kondo

Confirmation of shared genetic risk between schizophrenia and bipolar disorder; a replication study of schizophrenia SNP with bipolar sample

P-014-003

Filip Ventorp

CD44 and hyaluronic acid dependent signaling in response to stress in mice and in suicide attempters

P-18-012

Sayuri Ishiwata

In vivo evidence for involvement of AMPA receptors and neutral amino acid transporters in the modulation of the extracellular D-serine contents in the rat medial prefrontal cortex

P-19-013

Yuki Kuwano

Autism-associated gene expression was commonly observed in peripheral leukocytes from subjects with autism and healthy mothers having autistic children

P-20-002

Kevin McCairn

Elimination of tic-related neuronal activity by deep brain stimulation via interlocking with stimulus pulses
